

Promise Healthcare: Building a Better Future

Jennifer Henry, MBA, BSN, RN, Chief Executive Officer, Promise Healthcare

Recognizing the pressing need for consistent, high-quality healthcare access in Rantoul, Illinois, Promise Healthcare swiftly mobilized its team. Within a remarkably short period—from March to December 2023—Promise Healthcare established a School-Based Health Center in Rantoul that serves students and everyone in the community. The center offers primary care, behavioral health and psychiatric services.

This is Promise Healthcare's first clinic in Rantoul, as such, residents and local officials are ecstatic on how grateful they are for this clinic. This initiative demonstrated the astounding way the Promise Healthcare team takes a proactive approach to service, and their strong commitment to meeting community needs.

Looking forward, Promise Healthcare is continuing to listen and meet community needs by entering into planning work to place a third school-based health center with Champaign Unit #4 Schools. This expansion demonstrates a forward-thinking vision to extend quality healthcare services beyond current boundaries, aiming to benefit more students, families, and community members.

Promise Healthcare also purchased a mobile van that is being equipped for vision services and will be placed at their main location. These comprehensive services ensure that patients receive coordinated care tailored to their diverse needs.

Promise Healthcare is open five days a week, including an expansion of evening hours. They have also expanded their dental clinic at the main location with the addition of six additional dental operatories.

The ongoing growth of Promise Healthcare is a testament to the dedication and collaboration of their entire team. From board members to staff, everyone is working diligently and cooperatively to realize the vision of accessible healthcare for all. ■
